EDUCATION

- Sept 2022 - Jan 2023* Invited Visiting PhD, **Columbia University**, New York City
I was a visiting PhD student at Columbia University under the supervision of the Pr. O'Flaherty, to work on criminality and predictive policing algorithms.
I am the recipient of the Doctoral mobility grant from the Alliance program.
Courses : Machine Learning (CS Department), Issues in Political Theory (Political Science Department)
- Sept 2019 - Current* PhD Candidate in ECONOMICS, **Université Paris 1 - Panthéon Sorbonne**, Paris
Thesis subject : *The application of Machine Learning in public policy* - Supervised by Pr. Kopp
First paper : I estimate the heterogeneous effect of dropping out on former students' labor market outcomes using causal Random Forest methods with an Instrumental Variable setting. The objective of the paper is to question the actual resources distribution of the french dropout policy.
Second paper, co-authored with Yann Lecorps (Paris 1) : We perform an econometric evaluation of a french predictive policing system (PAVED), and study the efficiency and indirect effects of this algorithm.
Third paper, co-authored with Cesar Barilla and Yeon-Koo Che (Columbia University) : We apply a multi-armed bandit model on a predictive policing case to empirically test the caveat of endogenous datafication. We develop a benchmark of predictive policing algorithms by using the NYPD offenses database.
Courses : Optimization and Statistics for statistical learning, Machine Learning for Economics, Economics of Education, Microeconomics fairness
- 2018 - 2019 Master 2 in PUBLIC POLICY - *With honors*, **Université Paris 1 - Panthéon Sorbonne**, Paris
Thesis: Bias and Discrimination in Public Algorithms : a predictive policing case
